

Jonathan Kyle Hobson

ASG - Instructional Designer (Temporary)

Mesa, Arizona | JonathanKyleHobson@gmail.com

September 11, 2026

Dear ASG team,

ASG's emphasis on UX and design thinking in learning fits the way I approach instructional design: identify what someone needs to do, give them useful practice, and revise the material when the instructions or feedback leave a gap. I'm applying for the temporary Instructional Designer role with experience at Arizona State University, a published Coursera Guided Project, and ongoing product design and research work.

At ASU Knowledge Enterprise, I developed digital learning materials and workshops from April 2022 to October 2024, incorporating accessibility improvements and inclusive learning practices. In an overlapping AI Analyst role, I designed and evaluated voice and chat flows and shared findings with project leaders. I also proposed a personalized-task workflow with mentor review of learner context and generated tasks.

For Coursera, I created and taught ChatGPT 4o for Beginners: Create Social Media Content. I wrote the learning sequence and recorded demonstrations that let beginners inspect a draft and see how a revision instruction changed it. Course review led me to revise distractors, add application to a definition question, correct task references and improve retry feedback. My portfolio includes original lesson material and the documented revisions.

At FactorLab, I design web and mobile workflows in Figma and document interaction behavior for engineering. That experience would help me discuss learning requirements with subject-matter experts and make review decisions specific. My authoring evidence is strongest in original lessons, recordings and assessment revisions; I would need onboarding to ASG's Evolve or Articulate 360 production workflow.

I'm based in Mesa, Arizona and am applying on the basis of the listing's 100% remote U.S. work arrangement. I'm available to start as soon as possible and interested in supporting the September–December assignment. I would welcome a conversation about the learning products that need attention first.

Thank you,
Kyle Hobson
