

Research that gives teams direction.

Survey research, qualitative synthesis,
and usability recommendations.

Selected work for Blenderbox
September 2026

Interest leaves a question unanswered

What makes it difficult for an engaged audience to take the next step?

I led survey creation, launch, and analysis, combining quantitative questions with open responses.

1,459

completed submissions

March 14, 2025 report snapshot
Voluntary audience; survey still live

Different barriers need different support

Five reported percentages from the original findings report

The pattern suggested smaller starting actions and concrete support.

Follow a finding into a testable proposal

Reported obstacle

Requested support

My proposed next test

Unclear action steps

Templates and simpler
instructions

Can someone adapt a
template and complete
the first step?

The findings informed a proposed Action Hub. Adoption and business impact were not measured.

Make trust a concrete research question

I coded privacy-community material in Dovetail and used the themes to reconsider an audience assumption.

Data security

How is personal information protected?

Accountability

What can someone do about an organization's practices?

Personal control

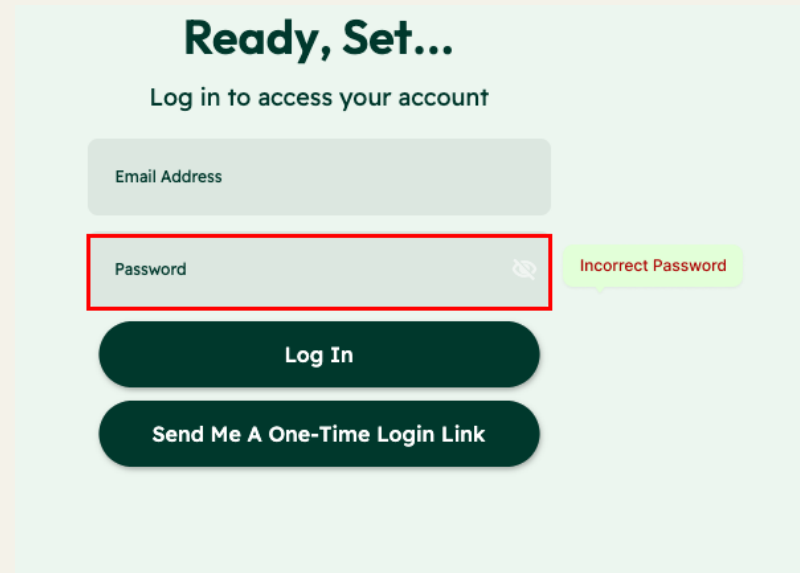

Can an explanation lead to a usable choice?

Questions paraphrase the retained themes. Community observations identify a risk; they do not establish market fit.

Name the risk. Show the alternative.

I connected navigation and feedback findings to visual recommendations, then presented them for backlog discussion.

An expert evaluation informed the proposal. I collaborated with the lead UX designer; implementation and measured improvement remain unverified.

Original proposed login-feedback treatment

Carry the decision into the flow

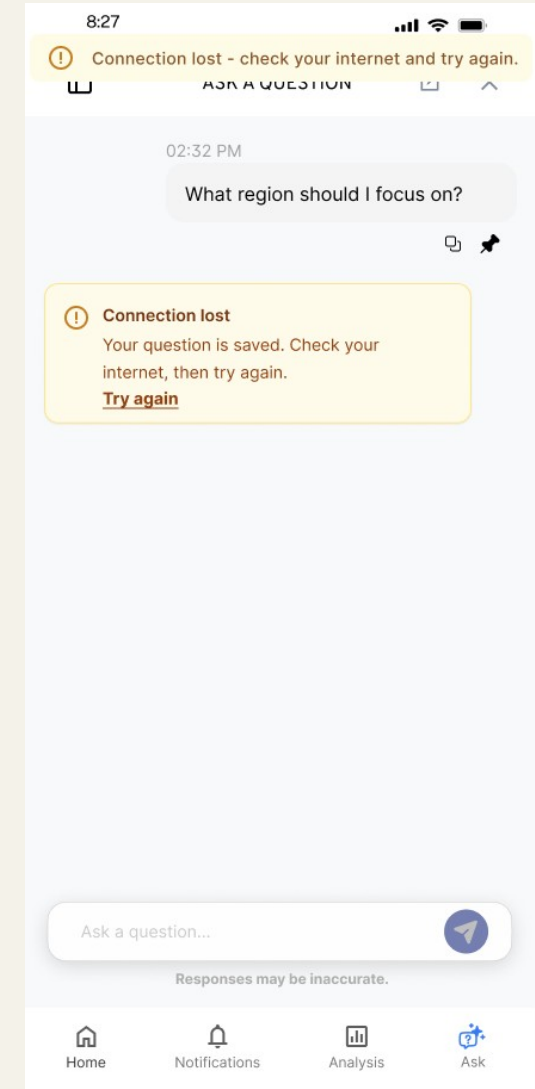

An interrupted AI answer and a lost connection need different next actions.

I designed connected states and used annotated walkthroughs to resolve the behavior with engineering.

Incomplete answer

Connection lost

Give a client team a clear next step

My university learning work and technical communication background help me explain findings across different roles and constraints.

01 Agree on the service task, users, and decision

02 Plan focused research and document its limits

03 Discuss the finding and the next design check

Proposed approach for a future project; no previous Blenderbox or government-service engagement is claimed.

Kyle Hobson

Survey research, qualitative synthesis,
and usable next steps.

Mesa, Arizona / U.S. remote contracts / Available for project work
