

Jonathan Kyle Hobson

Senior Product Designer | ShopMy

Mesa, Arizona | JonathanKyleHobson@gmail.com

September 8, 2026

Dear ShopMy hiring team,

ShopMy brings creators, brands, and shoppers into a connected product, with different goals at each step. Your creator guide shows that range clearly: discovering brand partners, discussing campaign details, and deciding what to do next. I am interested in the Senior Product Designer role because it combines research-informed decisions with the interface craft that makes those tasks understandable.

At FactorLab, I developed reusable About Me insight widgets for SmartTagIt and explored their information order and density. A comparison can be visually clear and still leave its meaning unresolved. I raised questions about the reference group and wording alongside the screen designs so the team could decide what the interface should communicate.

For Flint, I designed mobile question entry, waiting, and recovery states, then connected their next actions in engineering walkthroughs. An incomplete answer and a lost connection need different responses. That work reflects the attention I bring to a complete flow, including the points where the expected path breaks down.

At Oak AI, I led a survey for a creator and advocacy audience and connected the findings to a proposed Action Hub. The report showed requests for clearer steps and reusable templates. This advocacy study gave the team a narrower set of needs to explore; the Action Hub remained a proposal. I would bring that habit of separating an audience signal from an untested product assumption to ShopMy's design discussions.

I bring six years of Figma experience, a master's degree in User Experience, and practice working through alternatives with stakeholders and developers. I am based in Mesa, Arizona, authorized to work in the United States without sponsorship, and available to start as soon as possible. I would welcome a conversation about the creator or brand workflows this designer would own.

Thank you,
Kyle Hobson
