Learning design grounded in the task

At ASU Knowledge Enterprise, I developed digital learning materials and workshops with accessibility improvements and AI-supported content workflows.

April 2022–October 2024

MS in User Experience · BS in Technical Communication

A practical sequence for beginners

ChatGPT 4o for Beginners: Create Social Media Content

TASK OBJECTIVE

coursera

Task 3

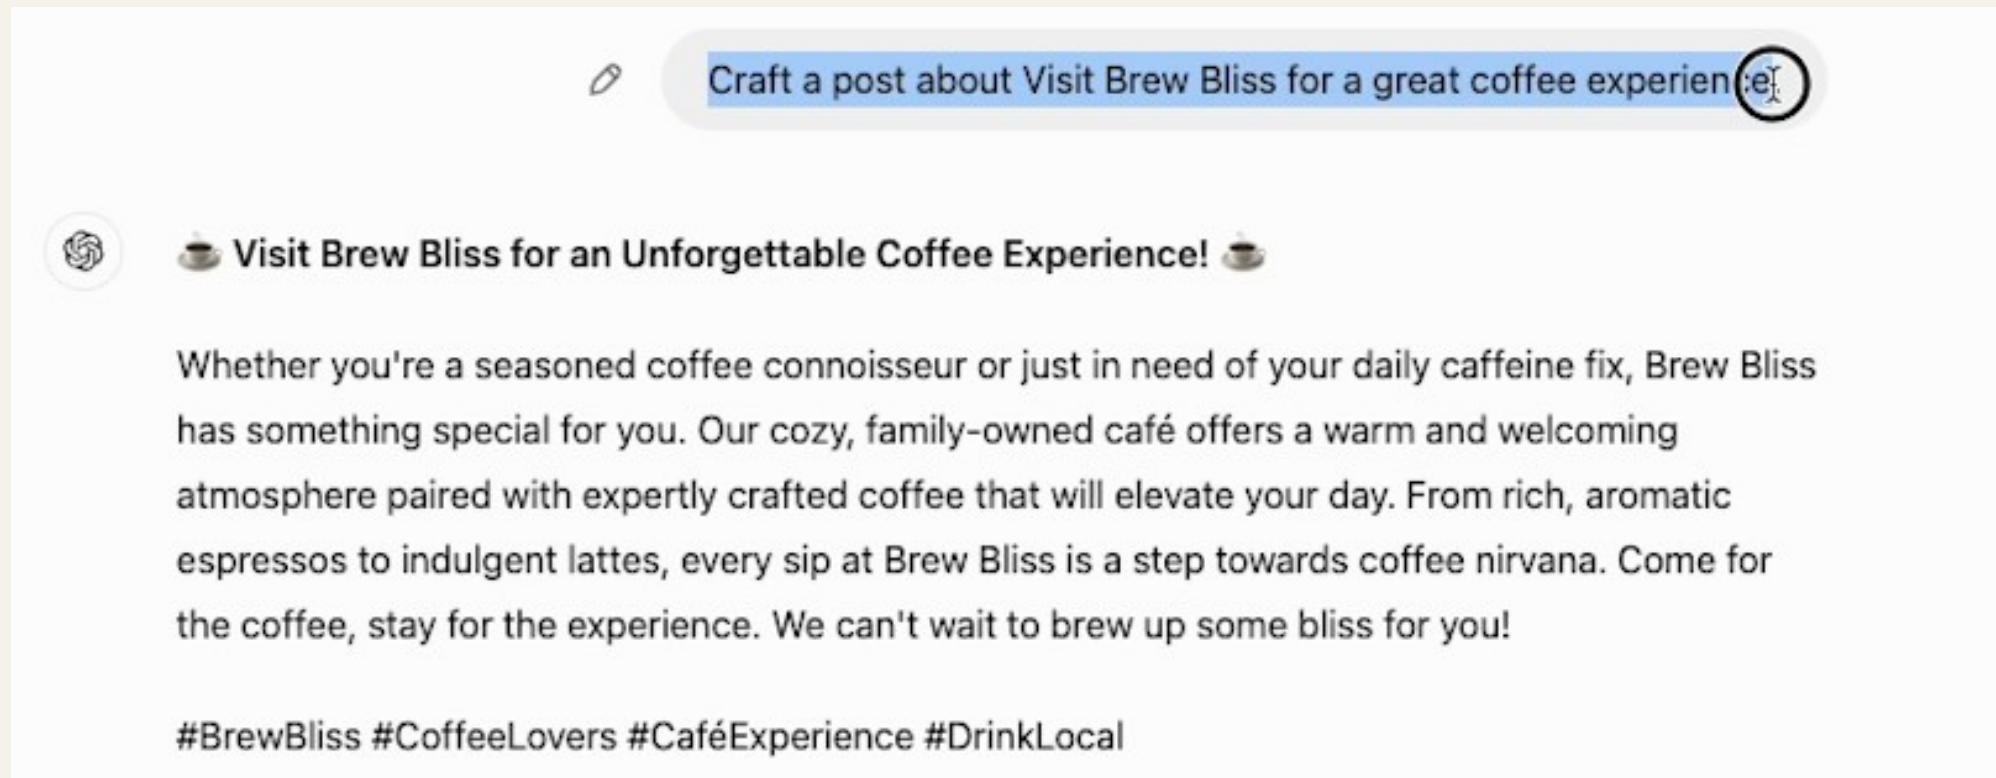

Goals

Iteratively Transform Content Using AI

- Use ChatGPT to create an initial draft and make iterative refinements.
- Practice refining drafts using different prompt techniques and feedback loops.
- Analyze how each iteration impacts content quality and alignment with goals.

A concrete change learners can inspect

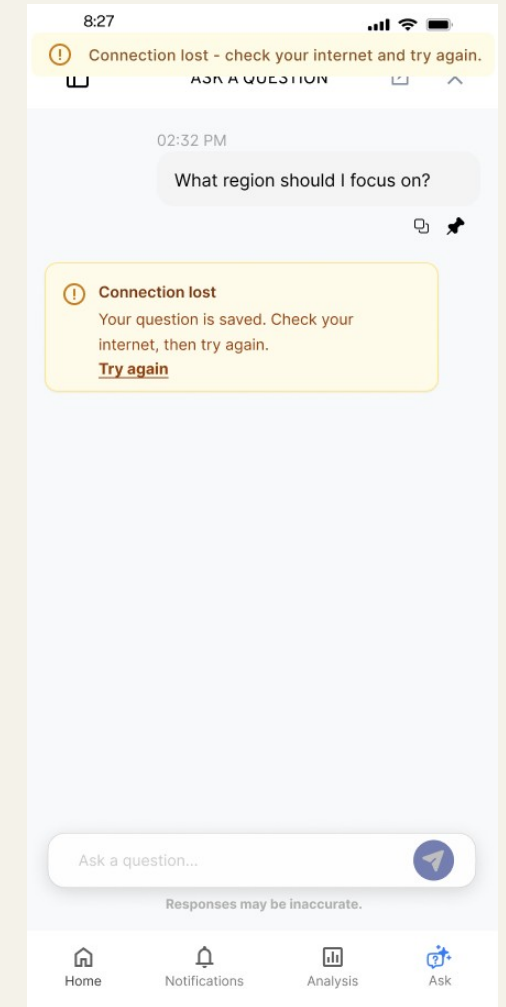

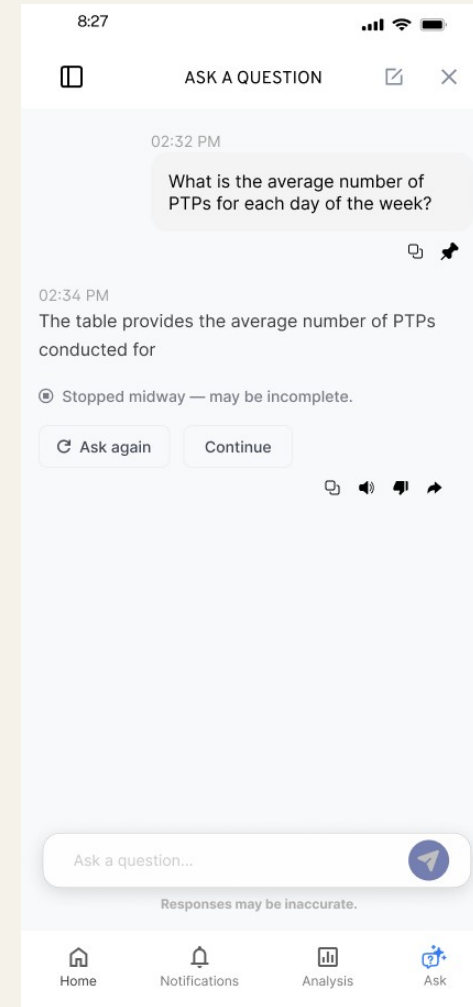

The next step is to make the request more specific and compare the result.

Recovery guidance has to describe the real state

An interrupted answer and a lost connection needed different messages and actions. I organized those states in Figma and annotated the behavior for engineering.

For KPA learning materials: explain the condition, then the action a learner should take.

A rewrite must preserve the requirement

ORIGINAL FIXTURE PROMPT

Return valid JSON only with fields category, article_id, confidence, and suggested_response. If confidence is below 0.7, set suggested_response to needs_review. Success: parser accepts the response.

SHORTER REWRITE

Return a clean structured answer with the best response for the user.

Expected winner: the original

The rewrite loses named fields, JSON-only output and the review condition.

Technical content needs a review owner

I proposed staged generation of personalized learner tasks, with a mentor checking the context and the output.

Simplified reconstruction of my 2024 proposal. Deployment and time savings were not established.

REVIEW GATE 01

REVIEW GATE 02

One decision.

A useful practice task.

For KPA, I would start with one learner decision and an approved source, then agree on the example, practice task and review owner.

Identify the decision and the conditions that change the correct action.

Build a worked example, a practice activity and useful feedback.

Review accuracy and accessibility with the subject matter expert.

Track source versions and revisions so the lesson stays consistent.

Proposed first assignment; regulatory interpretation stays with KPA's subject matter expert.

Instructional Designer

Based in Mesa, Arizona. Open to occasional Lafayette meetings.
Authorized for U.S. work without sponsorship. Available ASAP.
