

Find the friction. Clarify the next step.

Research, information architecture and design
for useful audience experiences.

Future contractor pool · Contract UX Designer (Evergreen) · September 2026

What keeps interest from becoming action?

I led survey design, launch and analysis.

I combined structured questions about barriers with open responses about what would help.

A voluntary audience sample surfaced reported needs. It could not establish future use or purchase.

DATED SOURCE SNAPSHOT

While the survey was still live.

March 14, 2025 · submission status in the original report

1,459

Completed submissions

1,741

Total submissions

282

Incomplete submissions

ORIGINAL REPORT EXCERPT

Overview

- Total of **1,459** completed finished submissions as of March 14th 2025.
- Total of **1,741** with 282 incomplete response. Note: Survey is still live.

Original report, page 4 · survey live at the time of this snapshot
Counts describe submissions; a final response-level export was unavailable in this review.

Reported barriers to taking action

Original findings report · March 2025

Reported percentages · per-item response base unavailable · voluntary audience sample

A proposed Action Hub direction

The findings pointed toward smaller, clearer actions and support for following through.

REPORTED NEED

Overwhelm and unclear steps

Limited time

Doubt about whether action matters

PROPOSED DIRECTION

A focused action with instructions

Reusable templates and task support

Visible progress and feedback

Next validation: test whether people can choose and complete an action in a prototype.

Make the starting choices clear

Training an assistant, starting a Vibecheck and requesting support competed at the same entry point.

I compared labels and sitemap alternatives, then collaborated on shared navigation with the lead designer.

Expert evaluation and design recommendations

-  Log Out

Two outlines, different entry points

Version 1: VibeCheck first

After login, consent and optional onboarding.

4. VibeCheck Model Screen (Primary Screen)

- Direct landing screen post-login or account onboarding.

Original page 8 · selected entry detail

Version 2: Homepage first

After login and consent.

3. Homepage

- Main dashboard of the web application.
- **Body Content:**
 - **Vibe Check:** Access to the Vibe Check model.
 - **Train AI Area:** Links to training sections.

Error feedback beside the field

I made the problem field visible where a person could act on it.

The recommendation gave the team a specific behavior to discuss and prioritize.

Original

The original login form is titled "Ready, Set..." with the subtitle "Log in to access your account". It features two input fields: "Email Address" and "Password". Below the fields are two buttons: "Log In" and "Send Me A One-Time Login Link". The form is set against a light blue background.

Original error at the page footer

Error: Invalid login credentials

Proposed

The proposed login form is identical to the original, but with a red border around the "Password" field and a green feedback message "Incorrect Password" displayed to the right of the field. The buttons and background remain the same.

Proposed feedback beside the field

Organize content by the question it answers

**Summaries. Recommendations. Simple 7.
Comparisons. Accomplishments.**

I explored content density and reusable widget structures, then worked with engineers on what each action opened.

Original design detail · sample content

A focused first action to test

Understand the audience

Agree on the user's task and the client's intended result. Review existing evidence and what is still unknown.

Make a small prototype

Use a concrete scenario to compare ideas with clients, designers and developers.

Map the useful content

Compare labels, page relationships and the information people need before committing to an action.

Observe the next step

Test comprehension and task completion. Record where content or structure needs revision.

Available for future freelance UX work

Mesa, Arizona. Full U.S. work authorization. Available for remote projects as they arise.
