

Help people shape what comes next

Product interfaces, research, and teaching
that help people make a deliberate choice.

Selected for Playlab · Senior Product Designer · September 2026

Product work shaped by research and teaching

OCT 2025–PRESENT

FactorLab

UX Designer & Researcher

Figma mockups, web/mobile interactions, and engineering partnership.

2023–2025

Oak AI

Lead UX Researcher

Product evaluation, survey research, navigation and recovery recommendations.

2022–2024

ASU + Coursera

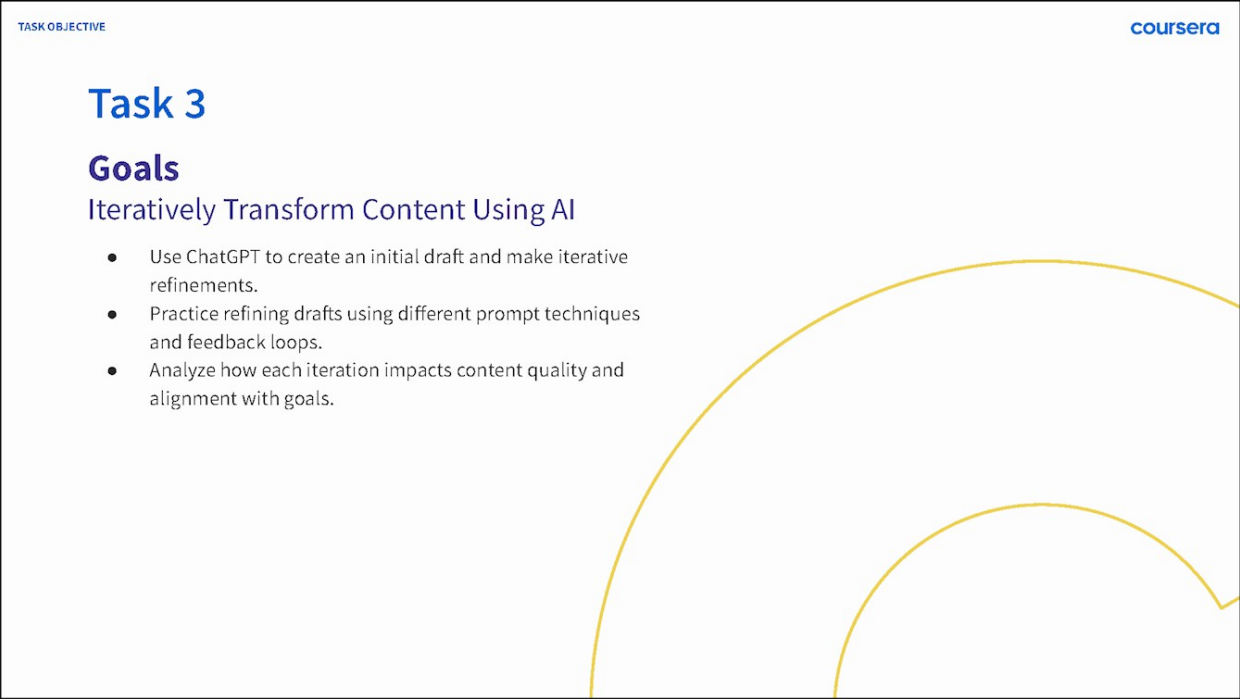

Learning and applied AI

Digital materials, conversational flows, and a published beginner project.

Give beginners a task they can practice

I created and taught a one-hour beginner project on AI-assisted social content.

Learners draft, compare and revise content, then organize a weekly calendar.

The screenshot shows a document titled 'TASK OBJECTIVE' in the top left and the 'coursera' logo in the top right. The main heading is 'Task 3' in blue. Below it is the section 'Goals' in bold purple, followed by the subtitle 'Iteratively Transform Content Using AI' in purple. A bulleted list contains three items: 'Use ChatGPT to create an initial draft and make iterative refinements.', 'Practice refining drafts using different prompt techniques and feedback loops.', and 'Analyze how each iteration impacts content quality and alignment with goals.' The bottom right of the page features two large, thin yellow curved lines.

TASK OBJECTIVE

coursera

Task 3

Goals

Iteratively Transform Content Using AI

- Use ChatGPT to create an initial draft and make iterative refinements.
- Practice refining drafts using different prompt techniques and feedback loops.
- Analyze how each iteration impacts content quality and alignment with goals.

Original lesson goals · Published teaching, not measured learner improvement

Start with a draft a learner can inspect

Craft a post about Visit Brew Bliss for a great coffee experience.

☕ Visit Brew Bliss for an Unforgettable Coffee Experience! ☕

Whether you're a seasoned coffee connoisseur or just in need of your daily caffeine fix, Brew Bliss has something special for you. Our cozy, family-owned café offers a warm and welcoming atmosphere paired with expertly crafted coffee that will elevate your day. From rich, aromatic espressos to indulgent lattes, every sip at Brew Bliss is a step towards coffee nirvana. Come for the coffee, stay for the experience. We can't wait to brew up some bliss for you!

#BrewBliss #CoffeeLovers #CaféExperience #DrinkLocal

A familiar café task gives the learner something concrete to examine.

The model adds business details that the prompt did not establish. Those details need judgment.

Make the revision visible

Recorded revision: ask for sensory detail and a friendly invitation.

Step into Brew Bliss: Where Every Sip Tells a Story

At Brew Bliss, we believe coffee is more than just a drink—it's an experience, a moment of bliss that connects you to a world of flavors, aromas, and community. As soon as you walk through our doors, the rich scent of freshly ground beans envelops you, inviting you to explore our carefully curated menu.

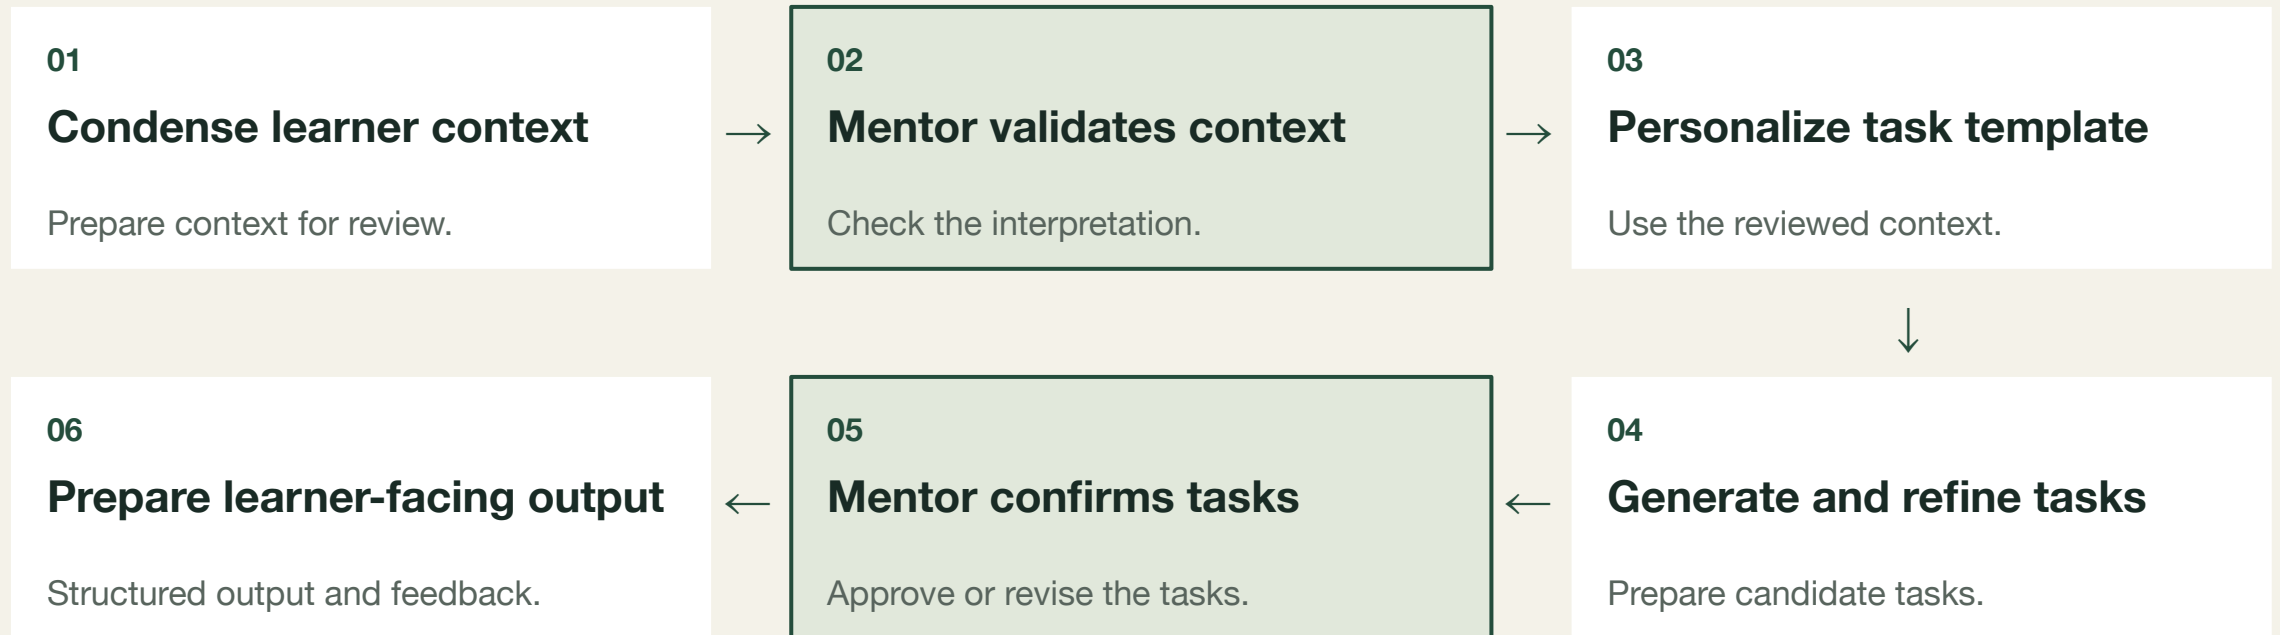

From the first sip of our velvety lattes to the last drop of our bold espressos, each cup is crafted to perfection, showcasing the intricate notes of single-origin beans and the warmth of our baristas' expertise. Whether you're a gourmet enthusiast savoring the complexity of a specialty roast, or someone who loves a sweet, seasonal treat like our caramel-infused pumpkin spice, we've got a brew that speaks to your soul.

**The next draft is richer
—and longer.**

Review the added claims, the audience and the length before deciding what to change next.

Human review before learner-facing tasks

A staged prompt workflow for personalized learner tasks.

Simplified reconstruction · Documented proposal; no deployment or measured efficiency claimed.

What keeps interest from becoming action?

I led survey design, launch and analysis.

I combined structured questions about barriers with open responses about what would help.

A voluntary audience sample surfaced reported needs. It could not establish future use or purchase.

Reported percentages · per-item response base unavailable · voluntary audience sample

Recovery feedback needed a clearer location

The existing error appeared at the page footer, away from the login fields.

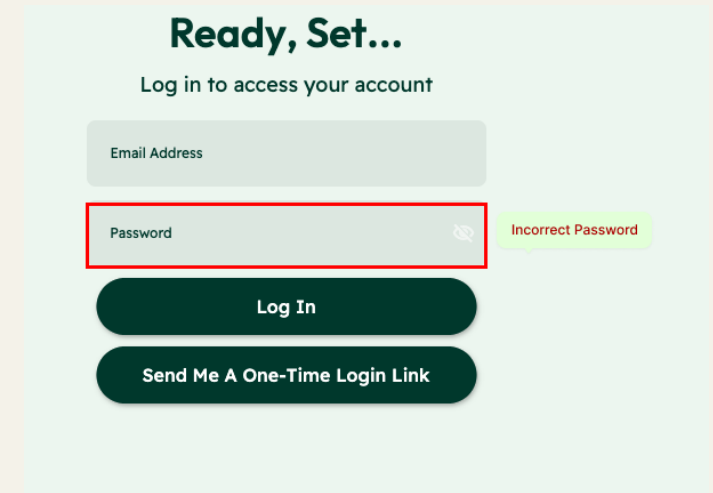

I recommended placing the correction beside the field where someone could act.

Original

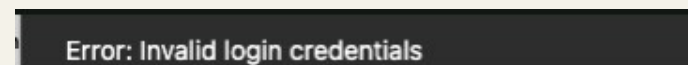

The original login form is titled "Ready, Set..." and includes the instruction "Log in to access your account". It features two input fields: "Email Address" and "Password". Below the fields are two buttons: "Log In" and "Send Me A One-Time Login Link". The form is set against a light blue background.

Proposed

The proposed login form is identical to the original but includes an error feedback mechanism. A red rectangular box highlights the "Password" input field. To the right of this box, a green message bubble contains the text "Incorrect Password". The rest of the form, including the title, instruction, email field, and buttons, remains unchanged.

Original page-footer error

The original page-footer error message is displayed in a dark grey bar at the bottom of the page. It contains the text "Error: Invalid login credentials" in a white, sans-serif font.

Check whether the skill transfers

For a different task, I would ask a learner to identify an unsupported detail, choose a revision, and explain why the next draft serves the goal.

This is a proposed assessment drawn from the lesson, not a reported learner study.

Task Summary

Iteratively Transform Content Using AI

Key Takeaways

- Iterative refinement of prompts leads to higher-quality, more polished content over time.
- Feedback loops with AI allow for continuous improvement, helping you adjust content for clarity, engagement, and style.
- Each iteration builds on the previous one, resulting in a more aligned output that meets your goals.

Watch an educator make the next change

When an AI draft misses the learning goal, can a first-time builder decide what to change?

Observe a real task. Prototype one revision step with an engineer. Test whether the educator can explain the change and judge its result.

Let's make the next step clearer

Based in Mesa, Arizona. Available for remote work in the United States and ready to start as soon as possible.
