

Jonathan Kyle Hobson

Product Experience Designer (PXD), Senior Analyst | EAB

Mesa, Arizona | JonathanKyleHobson@gmail.com

September 8, 2026

Dear EAB product team,

A product demonstration needs to make the behavior clear enough for people to question it. That is the connection I see between your Product Experience Designer role and my work: I build prototypes, explain the choices behind them, and keep proposed behavior distinct from what a product already does.

At FactorLab, I design SmartTagIt experiences and walk developers through the details. For the Flint assistant, I connected the first question to waiting and recovery states, including different next actions for interrupted answers and connection loss. In the About Me work, I developed reusable insight widgets and examined what a comparison could reasonably tell someone. These projects required both a coherent product story and careful attention to the states behind the story.

My university experience adds context for EAB. As an AI Analyst at ASU Learning Innovations, I designed and evaluated conversational flows and proposed a learner-task workflow with mentor review. As an Instructional Designer at ASU Knowledge Enterprise, I developed accessible learning materials and workshops. I also created a published Coursera guided project that uses a recorded demonstration to teach people how to revise AI-generated content against a clear goal.

I use Figma and have independently built and released Prompt Compass, a tool for inspecting prompt requirements and comparing versions. That combination helps me explore ideas while checking what an AI-assisted revision preserves or loses. At EAB, I would bring prototypes and explanations that product, engineering, and customer-facing colleagues can review together. The separate portfolio and presentation accompanying this application show the underlying artifacts and state what each example proves.

I would welcome a conversation about the product experience your team wants to make easier for an education partner to understand. I am based in Mesa, Arizona, authorized to work in the United States without sponsorship, and available to start as soon as possible.

Thank you,
Kyle Hobson
