

Product experiences people can explore

Prototypes and walkthroughs
for complex product behavior.

Selected work for EAB
September 2026

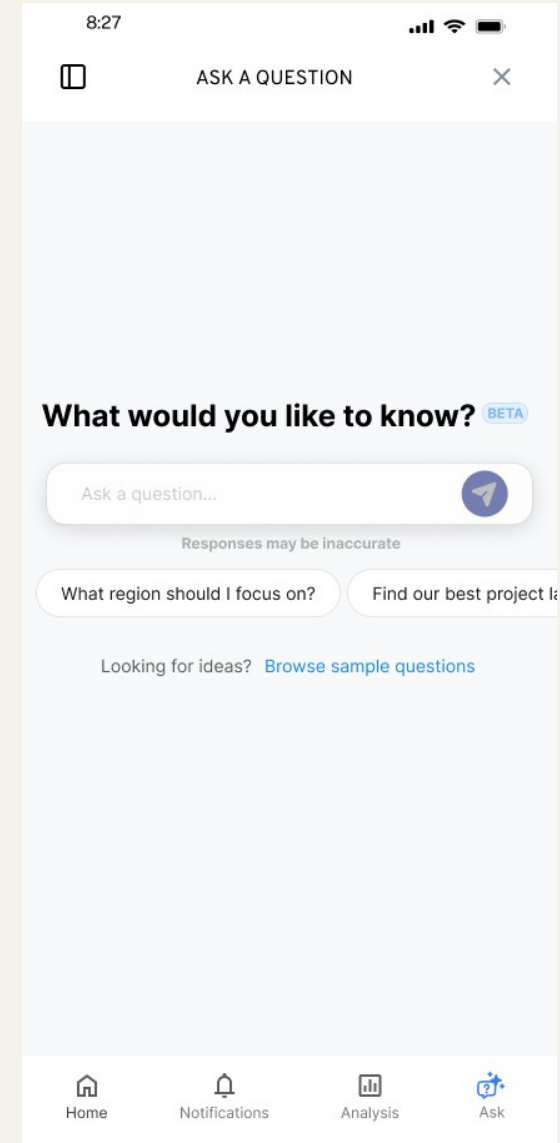

A useful first question

UX Designer & Researcher (Contract)
2025-2026

I explored suggested questions and a question library while keeping a person's own question close at hand.

Design deliverables and engineering handoff

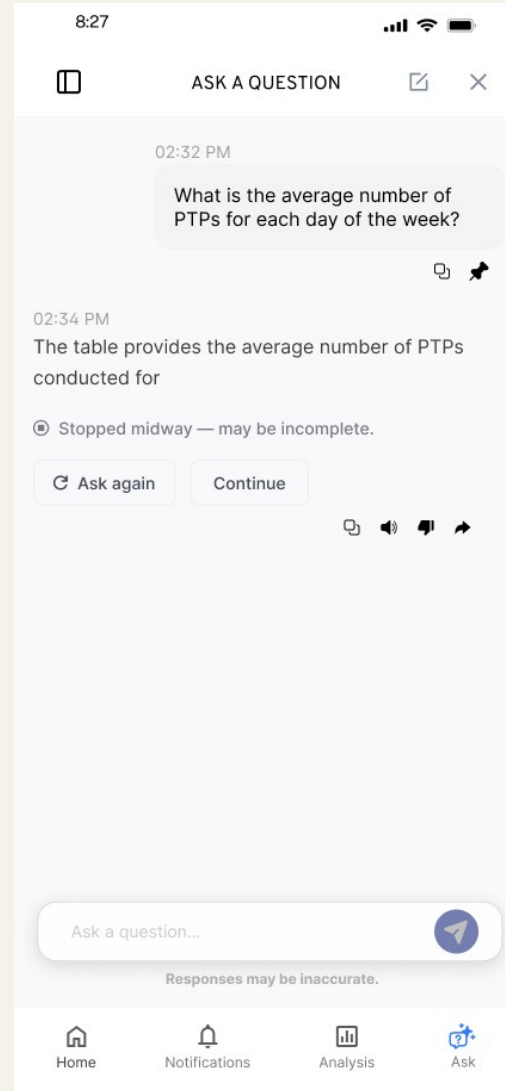

Recovery follows the failure

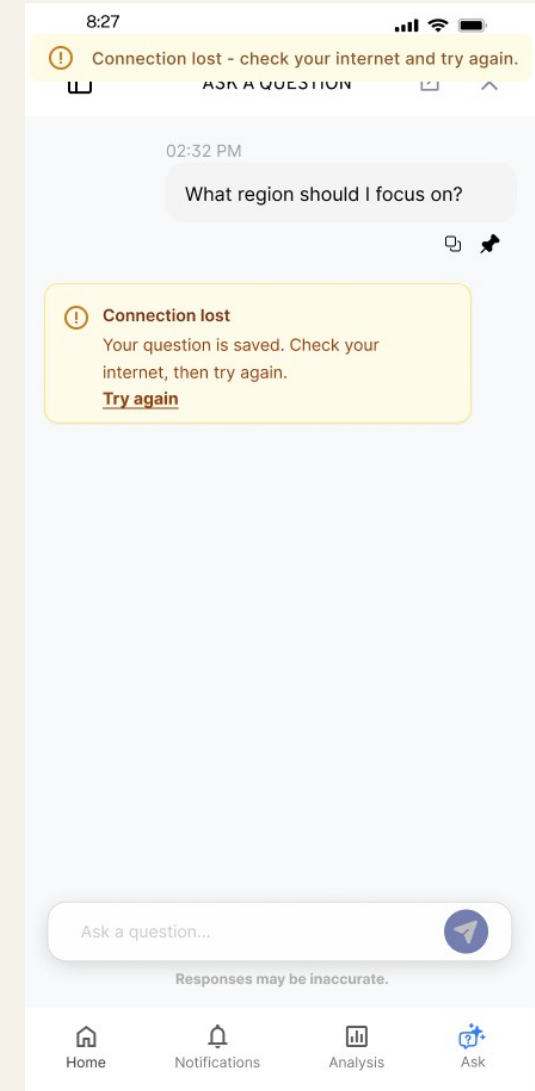

An incomplete answer and a lost connection need different next actions.

I assembled the connected flows and their next actions into an annotated handoff for engineering.

Incomplete answer

Connection lost

A comparison needs context

Mentioning fatigue less often is a comparison. Whether that is good depends on the context.

I raised the cohort and wording questions while developing reusable insight widgets.

Original design iteration with sample values

Mentor review in a learner workflow

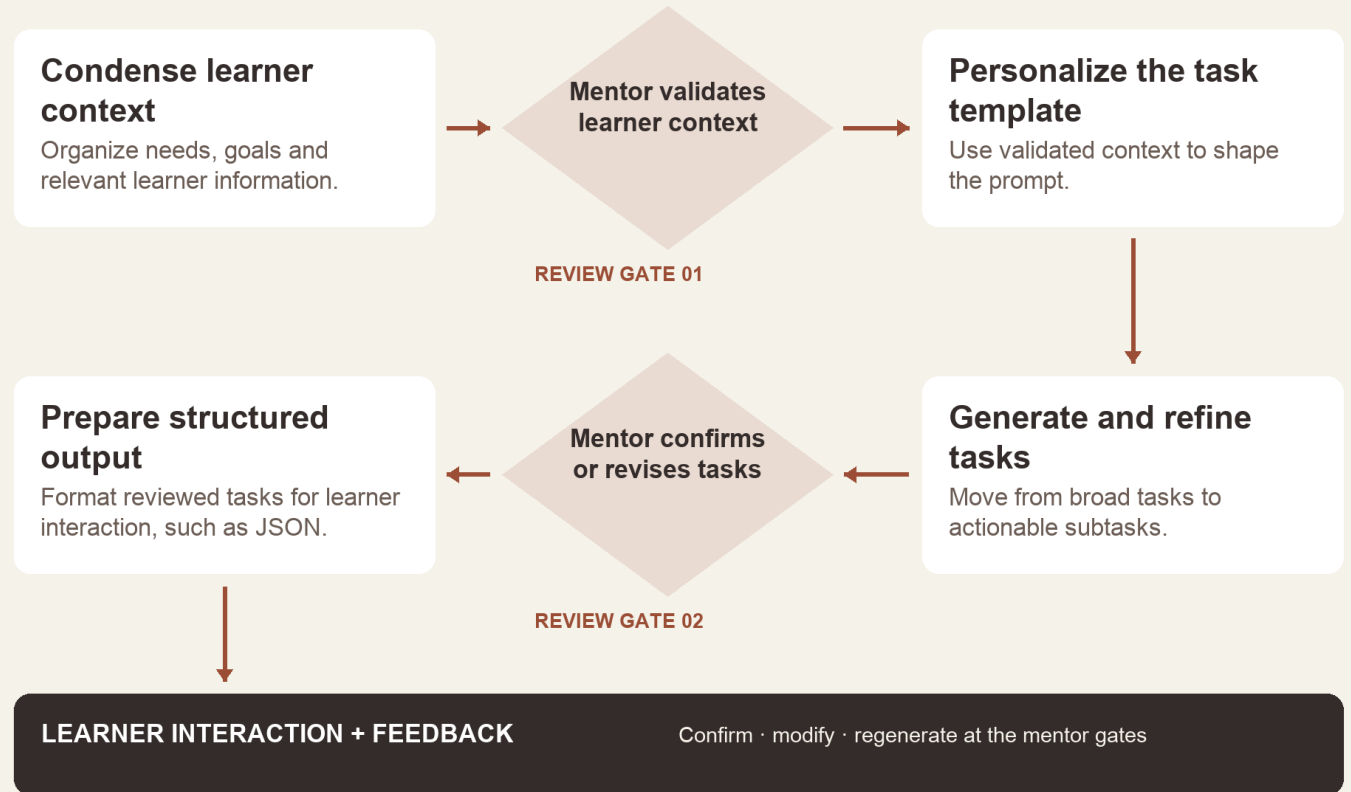

I proposed review of learner context and generated tasks at two points in the workflow.

Documented proposal
Simplified reconstruction

SIMPLIFIED RECONSTRUCTION · 2024 PROPOSAL

Mentor judgment at two decision points.

ASU for Life · proposed workflow for personalized learner tasks

Simplified reconstruction of Kyle's documented 2024 proposal
Human review gates are preserved. This is a proposal, not a claim of deployment or measured efficiency.

A demonstration becomes a practice task

I created a guided project around a familiar task: draft a social post, inspect the result, and make a purposeful revision.

Published beginner instruction
Original lesson goals

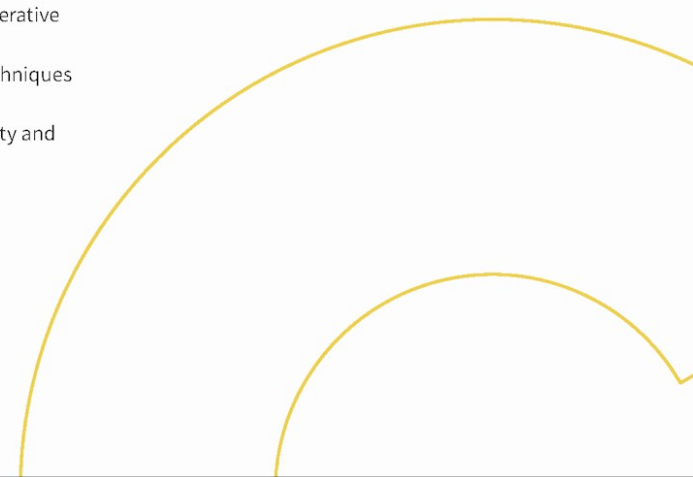

TASK OBJECTIVEcoursera

Task 3

Goals

Iteratively Transform Content Using AI

- Use ChatGPT to create an initial draft and make iterative refinements.
- Practice refining drafts using different prompt techniques and feedback loops.
- Analyze how each iteration impacts content quality and alignment with goals.

A prompt rewrite can lose requirements

Original request

Valid JSON, four named fields, and a low-confidence review rule.

Shorter rewrite

A clean structured answer with the best response for the user.

My tool compares requirements as well as wording. This developer-authored test exposes what the shorter request leaves out.

An EAB product demonstration

I would begin with one education partner's task and the product behavior that supports it.

01 A task the audience recognizes

02 A prototype reviewed with product and engineering

03 A clear label for current behavior and future concepts

Proposed approach for this role; no prior EAB work is claimed.

Kyle Hobson

Product design, higher education experience,
and clear explanations of how a product works.
