Task 3

Goals

Iteratively Transform Content Using AI

- Use ChatGPT to create an initial draft and make iterative refinements.
- Practice refining drafts using different prompt techniques and feedback loops.
- Analyze how each iteration impacts content quality and alignment with goals.

A first attempt gives learners something to revise

 Craft a post about Visit Brew Bliss for a great coffee experience

 Visit Brew Bliss for an Unforgettable Coffee Experience! 

Whether you're a seasoned coffee connoisseur or just in need of your daily caffeine fix, Brew Bliss has something special for you. Our cozy, family-owned café offers a warm and welcoming atmosphere paired with expertly crafted coffee that will elevate your day. From rich, aromatic espressos to indulgent lattes, every sip at Brew Bliss is a step towards coffee nirvana. Come for the coffee, stay for the experience. We can't wait to brew up some bliss for you!

The next step is to make the request more specific and compare the result.

Recovery guidance has to describe the real state

An interrupted answer and a lost connection needed different messages and actions. I organized those states in Figma and annotated the behavior for engineering.

Relevant to software documentation: explain what happened and what the person can do next.

A rewrite must preserve the requirement

ORIGINAL FIXTURE PROMPT

Return valid JSON only with fields category, article_id, confidence, and suggested_response. If confidence is below 0.7, set suggested_response to needs_review. Success: parser accepts the response.

SHORTER REWRITE

Return a clean structured answer with the best response for the user.

Expected winner: the original

The rewrite loses named fields, JSON-only output and the review condition.

Mentor review shaped the learner workflow

I proposed staged generation of personalized learner tasks, with a mentor checking the context and the output.

Simplified reconstruction of my 2024 proposal. Deployment and time savings were not established.

A product task becomes a learning activity

For an on-demand module, I would work with your subject matter experts to connect the product task with practice and a measurable learning goal.

Agree on the starting state and a successful result.

Show a worked example, including a recovery path.

Ask the learner to complete a different example and explain a decision.

Review errors with the expert and revise the material.

Proposed approach for discussion; no Inovalon product or client access is implied.
