

Learning for participation

Published instruction.

Learning workflows.

Research in a volunteer community.

Lead Learning Experience Designer application
September 2026

A beginner can practice the decision

I built a one-hour guided project around a familiar content task: draft a social post, inspect the result, and make a purposeful revision.

**4,700+ enrollments
as of September 2026**

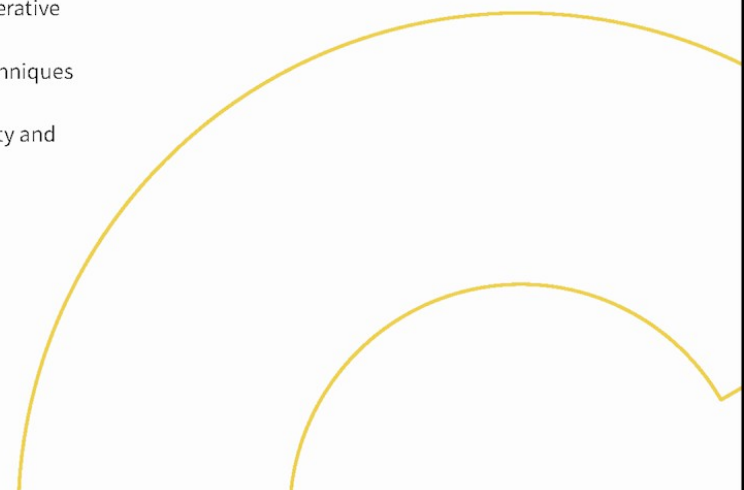

TASK OBJECTIVEcoursera

Task 3

Goals

Iteratively Transform Content Using AI

- Use ChatGPT to create an initial draft and make iterative refinements.
- Practice refining drafts using different prompt techniques and feedback loops.
- Analyze how each iteration impacts content quality and alignment with goals.

Two decorative yellow arcs are positioned in the bottom right corner of the slide. The larger arc starts near the bottom center and curves upwards and to the right. The smaller arc is nested below and to the right of the larger one, also curving upwards and to the right.

The revision is visible

Initial café-post draft

Craft a post about Visit Brew Bliss for a great coffee experience.

 ☕ **Visit Brew Bliss for an Unforgettable Coffee Experience!** ☕

Whether you're a seasoned coffee connoisseur or just in need of your daily caffeine fix, Brew Bliss has something special for you. Our cozy, family-owned café offers a warm and welcoming atmosphere paired with expertly crafted coffee that will elevate your day. From rich, aromatic espressos to indulgent lattes, every sip at Brew Bliss is a step towards coffee nirvana. Come for the coffee, stay for the experience. We can't wait to brew up some bliss for you!

#BrewBliss #CoffeeLovers #CaféExperience #DrinkLocal

Later draft after a more specific request

☕ **Step into Brew Bliss: Where Every Sip Tells a Story** ☕

At Brew Bliss, we believe coffee is more than just a drink—it's an experience, a moment of bliss that connects you to a world of flavors, aromas, and community. As soon as you walk through our doors, the rich scent of freshly ground beans envelops you, inviting you to explore our carefully curated menu.

From the first sip of our velvety lattes to the last drop of our bold espressos, each cup is crafted to perfection, showcasing the intricate notes of single-origin beans and the warmth of our baristas' expertise. Whether you're a gourmet enthusiast savoring the complexity of a specialty roast, or someone who loves a sweet, seasonal treat like our caramel-infused pumpkin spice, we've got a brew that speaks to your soul.

The second draft adds detail. Learners still need to check that the details fit the brief.

Checking transfer

I would give learners a different task and ask them to explain the next revision.

01 Which detail is unsupported?

02 What would you change in the instruction?

03 How will you judge the next answer?

Proposed follow-up assessment; these questions were not a reported learner study.

Mentor review before learner delivery

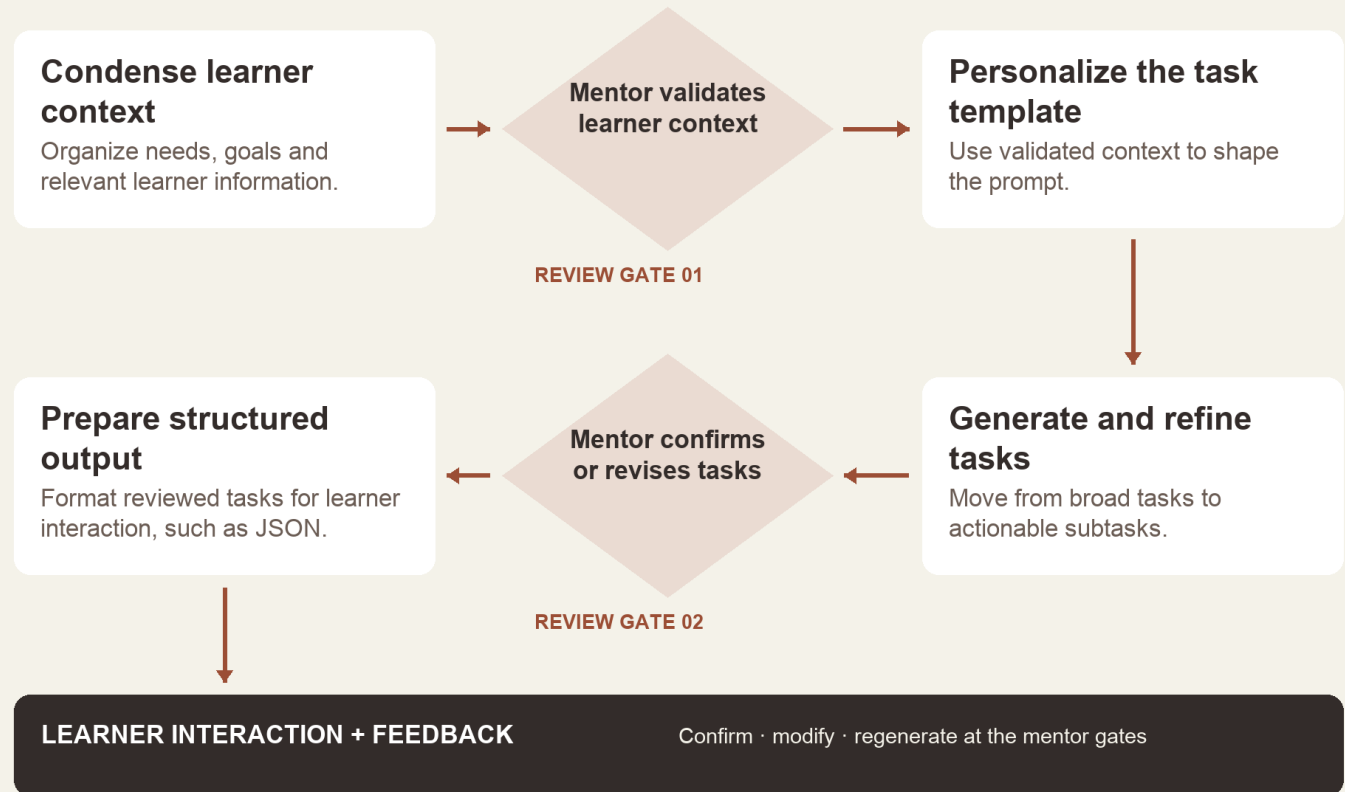

I proposed review of learner context and generated tasks at two points in the workflow.

Documented proposal
Simplified reconstruction

SIMPLIFIED RECONSTRUCTION · 2024 PROPOSAL

Mentor judgment at two decision points.

ASU for Life · proposed workflow for personalized learner tasks

Simplified reconstruction of Kyle's documented 2024 proposal
Human review gates are preserved. This is a proposal, not a claim of deployment or measured efficiency.

Research that keeps its source

I review lesson-player behavior with the team, including what happens to progress when a learner leaves.

I also built an internal research tool that keeps source references and flags evidence gaps.

RECONSTRUCTED FROM IMPLEMENTATION

Find the evidence before framing the answer.

Oppia Research Compass · an internal, read-only research tool

01 Search the historical evidence

Bounded search returns source labels and stable evidence IDs.

`oppia_research → search_oppia_research`

02 Retrieve the exact evidence

Fetch the selected chunk before quoting; keep its source reference.

`get_oppia_evidence`

03 Audit the evidence bundle

Check missing IDs, source concentration and evidence types.

`audit_oppia_evidence`

04 Frame the next research step

Review existing evidence, name the gap and propose a bounded follow-up.

`plan_oppia_research`

CLEAR BOUNDARIES

Retrieval supports judgment.

- SQLite opens read-only.
- Exact evidence stays separate from interpretation.
- The host AI writes the answer.
- External research requires an explicit follow-up.

Reconstructed from actual routing, retrieval, audit and planning code

No corpus records or participant content shown. This diagram does not imply autonomous synthesis.

A first learning experiment

Choose one contributor task with the volunteers who support it.

Observe the attempt

Find the point where people hesitate, get stuck, or need help.

Build the smallest useful aid

Try a demonstration, WikiLearn activity, or guidance in the workflow.

Check independent use

Observe the next attempt and listen to contributor feedback.

The task and format would be chosen with contributors; this is an approach, not prior Wikimedia work.
