

Make the instruction clear. Keep the review visible.

Instructional revision, clear feedback
and a documented response to review.

Learning Content Editor application · September 2026

Make revision something the learner can see

I created a beginner project around drafting, reviewing and refining content against a goal.

Published teaching activity. Learner improvement is not measured here.

Task 3

Goals

Iteratively Transform Content Using AI

- Use ChatGPT to create an initial draft and make iterative refinements.
- Practice refining drafts using different prompt techniques and feedback loops.
- Analyze how each iteration impacts content quality and alignment with goals.

Original 2024 lesson material · goals excerpt

Make the review change the material

Review finding	My documented revision
Choices were easy to eliminate	Reworked distractors, especially Questions 7, 8 and 10.
Question 7 tested only a definition	Added application of the concept alongside the definition.
Retry feedback revealed answers	Made feedback more neutral and referred learners to the lesson task.
Task references were incorrect	Corrected references across the assessment.

Review added detail before accepting it

The lesson made an instruction visible beside the result it changed. That gave learners something concrete to inspect.

The revised answer added detail. In my retrospective, I would make factual checks and length limits more explicit.

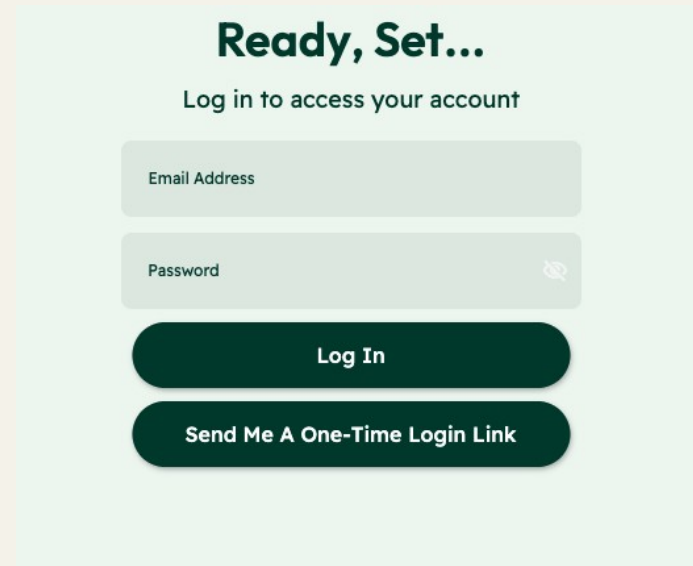

Can you make this more engaging and inviting? Include sensory details and a friendly tone. Enhance it with substantance and a call to actions that includes essence what brings a coffee Enthusiasts their love for coffee.

Error feedback beside the field

I made the problem field visible where a person could act on it.

The recommendation gave the team a specific behavior to discuss and prioritize.

Original

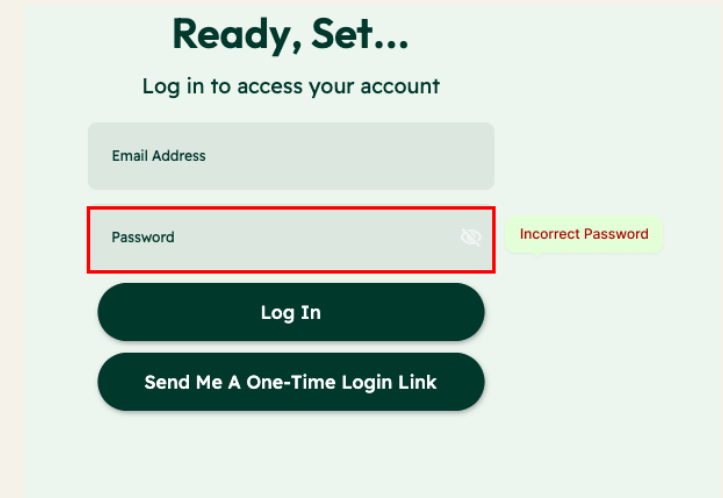

The original login form is titled "Ready, Set..." with the subtitle "Log in to access your account". It features two input fields: "Email Address" and "Password". The "Password" field has a toggle icon on the right. Below the fields are two buttons: "Log In" and "Send Me A One-Time Login Link".

Original error at the page footer

Error: Invalid login credentials

Proposed

The proposed login form is identical to the original, but with a red border around the "Password" field. A green feedback message "Incorrect Password" is displayed to the right of the field. The buttons "Log In" and "Send Me A One-Time Login Link" remain below the fields.

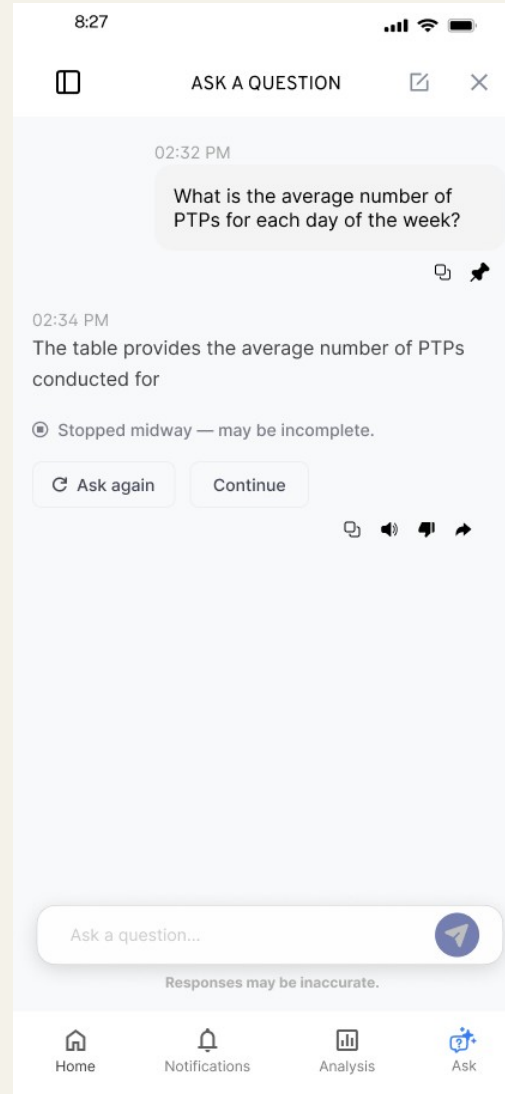

Proposed feedback beside the field

Recovery follows the failure

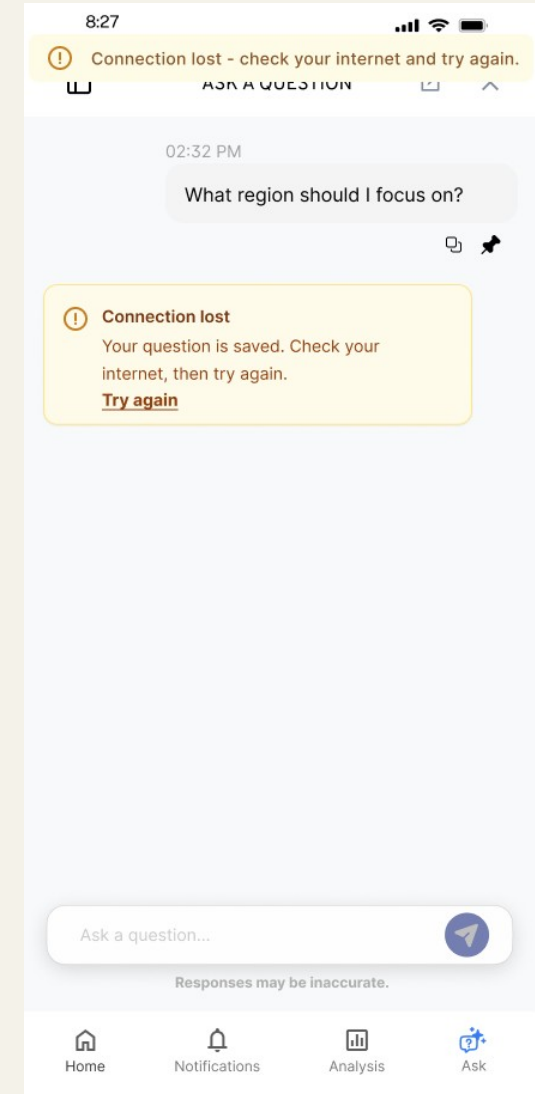

An incomplete answer and a lost connection need different next actions.

I assembled the flows and their next actions into an annotated handoff for engineering.

Incomplete answer

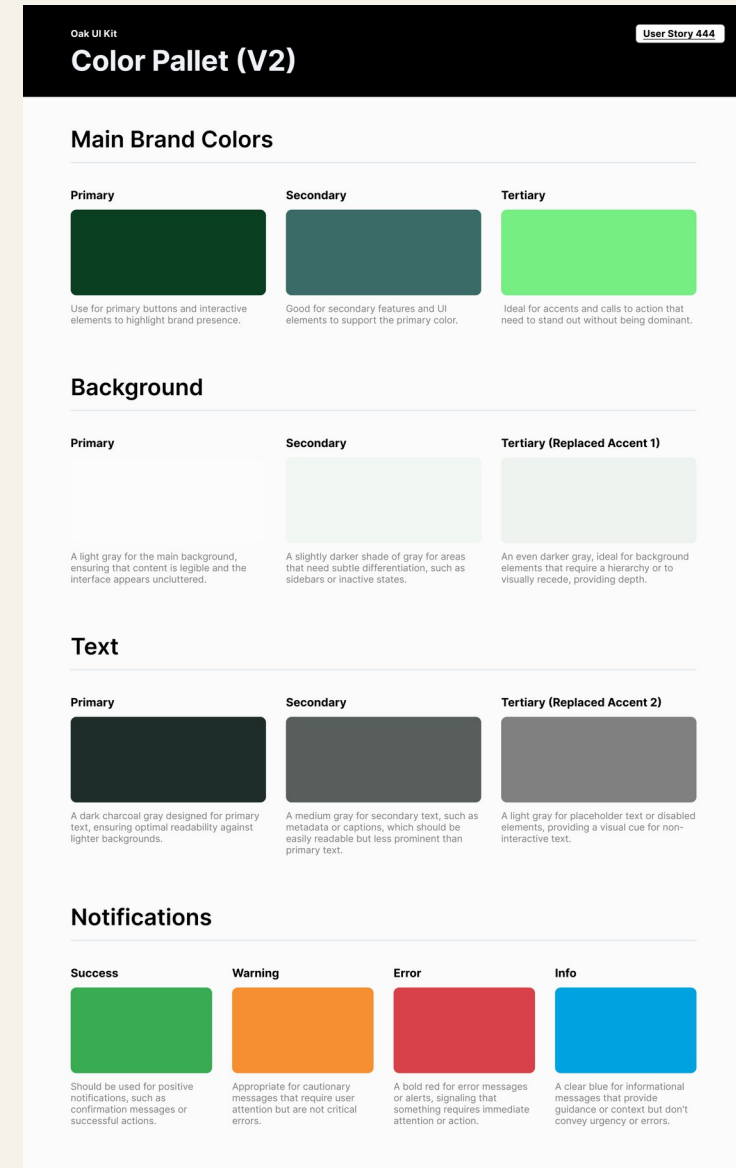

Connection lost

Give color a defined job

Brand, backgrounds, text and feedback
needed consistent roles across the
interface.

I documented those roles for the next design
iteration. This focused guide did not establish
a complete component library.

Keep an edit separate from its approval

My response notes describe the changes I made. The workbook retains the review finding and a separate QA-approval field.

The published course establishes publication. It does not establish that each recorded change received final approval.

Review finding

What needed attention

Instructor response

What I recorded changing

QA approval

A separate decision

Published course

A public release checkpoint

Review one training unit from end to end

Start with the learning task

Check objectives, instructions and practice.
Resolve factual questions with the relevant
subject specialist.

Inspect the rendered material

Review hierarchy, captions and callouts.
Learn the team's print-proof process and
check references after layout changes.

Apply the agreed style

Check terminology, grammar and references.
Use NSC's conventions and record exceptions
that need a decision.

Keep the revision traceable

Record edits and unresolved questions.
Confirm who reviews the content and what
constitutes approval before release.

Let's make training content easier to follow

Mesa, Arizona. Full U.S. work authorization. Available to start as soon as possible.
