Fetch Rewards Product Designer Application

Mesa, Arizona | JonathanKyleHobson@gmail.com

September 8, 2026

Dear Fetch team,

A reward can be appealing while the path to earning it is still unclear. Fetch's Rewards role interests me because it combines product craft with questions about why people begin a task and return to it. I bring product design and research experience across mobile and enterprise web workflows, with particular attention to entry points, feedback, and recovery.

At Oak AI, I connected usability evaluation with onboarding and navigation recommendations. Training an assistant, starting a Vibecheck, and asking for support competed at the same entry point. I made those choices explicit for the team and proposed error feedback beside the login field where someone could act on it. This was evaluation and design recommendation work; I would bring the same care to distinguishing a promising design from a measured growth result.

At FactorLab, I design SmartTagIt interactions with product and engineering. For About Me, I developed reusable insight widgets connecting a summary to observations and next actions, while questioning what a comparison should imply. For the Flint assistant, I defined entry, waiting, and recovery flows, including different actions for an incomplete answer and a lost connection. The work required clear Figma states and an annotated handoff that engineers could discuss and implement.

For Fetch, I would start by understanding a specific rewards journey and its goal, then prototype the uncertain moments: what earns progress, when it appears, and what a person can do if an action is interrupted. I would pair task-level research with the team's engagement and retention measures to decide what to change. My portfolio focuses on enterprise product interaction and research; direct rewards delivery and specialist animation tools are areas where I would need to build deeper experience.

I'm based in Mesa, Arizona, can start as soon as possible, and am authorized to work in the United States without sponsorship. I'd welcome a conversation about the Rewards team's priorities and the decisions this role would own.

Thank you,
Kyle Hobson
