

Useful feedback. Clear next steps.

Entry points, useful feedback,
and recoverable interactions.

Feedback with context

UX Designer & Researcher (Contract), 2026

I connected a personal summary to its supporting observations and a useful next action.

Design iterations shown with sample content.
Web/server release confirmed September 2, 2026.

Your safety focus this week

Repeated lift-plan checks showed up across your recent observations.

Your recent work suggests the crew is paying closer attention to lift planning, but **pinch-point hazards** still need a quick reminder.

✓ Based on 5 observations and 2 conversations

View why

Use this in today's pre-task

A comparison needs an interpretation

Mentioning fatigue less often is a comparison. Whether that is good depends on the context.

I raised the cohort, percentile and wording questions before they became interface rules.

Original widget, illustrative values

A useful first question

UX Designer & Researcher (Contract)
2025–2026

I explored suggested questions and a question library while keeping a person's own question close at hand.

Design deliverables and engineering handoff

Mobile and desktop conversation flows

Waiting is part of the conversation

I kept the question visible and gave the response a distinct waiting state.

Animation was an implementation question to resolve with engineering.

Original state detail

Recovery follows the failure

An incomplete answer and a lost connection need different next actions.

I assembled the flows and their next actions into an annotated handoff for engineering.

Incomplete answer

Connection lost

Competing entry points

Training an assistant, starting a Vibecheck and requesting support competed at the same entry point.

I used the audit to make these choices explicit for the team's review.

Usability evaluation and design recommendations

Error feedback beside the field

I made the problem field visible where a person could act on it.

The recommendation gave the team a specific behavior to discuss and prioritize.

Original

The original login form is titled "Ready, Set..." with the subtitle "Log in to access your account". It features two input fields: "Email Address" and "Password". The "Password" field has a toggle icon on the right. Below the fields are two buttons: "Log In" and "Send Me A One-Time Login Link".

Original error at the page footer

Error: Invalid login credentials

Proposed

The proposed login form is identical to the original, but with a red box highlighting the "Password" field. A green feedback message "Incorrect Password" is displayed to the right of the password field.

Proposed feedback beside the field

A rewards journey worth testing

Clarify the earning or redemption task. Identify what the person expects to happen and where progress becomes hard to understand.

Proposed test: can someone explain how to earn progress, recognize its current state, and recover from interruption? Pair that evidence with the team's retention measures.

Let's discuss Rewards design

Available for Fetch's Senior Product Designer, Rewards role. Based in Mesa, Arizona; ready to start as soon as possible.
