

Learning and documentation for Mi-Case

Selected work in practical teaching
and software workflow guidance

Learning and Development Specialist

Learning design grounded in the task

At ASU Knowledge Enterprise, I developed digital learning materials and workshops with accessibility improvements and AI-supported content workflows.

April 2022–October 2024

MS in User Experience · BS in Technical Communication

A practical sequence for beginners

ChatGPT 4o for Beginners: Create Social Media Content

TASK OBJECTIVE

coursera

Task 3

Goals

Iteratively Transform Content Using AI

- Use ChatGPT to create an initial draft and make iterative refinements.
- Practice refining drafts using different prompt techniques and feedback loops.
- Analyze how each iteration impacts content quality and alignment with goals.

A first attempt gives learners something to revise

The screenshot shows a text editor interface. At the top, a light blue header bar contains a pencil icon and the text "Craft a post about Visit Brew Bliss for a great coffee experience". Below this, the main text area contains a post draft. It starts with a circular icon containing a stylized 'B' logo, followed by the title "☕ Visit Brew Bliss for an Unforgettable Coffee Experience! ☕". The body of the post is a paragraph of text: "Whether you're a seasoned coffee connoisseur or just in need of your daily caffeine fix, Brew Bliss has something special for you. Our cozy, family-owned café offers a warm and welcoming atmosphere paired with expertly crafted coffee that will elevate your day. From rich, aromatic espressos to indulgent lattes, every sip at Brew Bliss is a step towards coffee nirvana. Come for the coffee, stay for the experience. We can't wait to brew up some bliss for you!". At the bottom of the post, there are four hashtags: "#BrewBliss #CoffeeLovers #CaféExperience #DrinkLocal".

Craft a post about Visit Brew Bliss for a great coffee experience

 ☕ Visit Brew Bliss for an Unforgettable Coffee Experience! ☕

Whether you're a seasoned coffee connoisseur or just in need of your daily caffeine fix, Brew Bliss has something special for you. Our cozy, family-owned café offers a warm and welcoming atmosphere paired with expertly crafted coffee that will elevate your day. From rich, aromatic espressos to indulgent lattes, every sip at Brew Bliss is a step towards coffee nirvana. Come for the coffee, stay for the experience. We can't wait to brew up some bliss for you!

#BrewBliss #CoffeeLovers #CaféExperience #DrinkLocal

The next step is to make the request more specific and compare the result.

Recovery guidance has to describe the real state

An interrupted answer and a lost connection needed different messages and actions. I organized those states in Figma and annotated the behavior for engineering.

Relevant to software documentation: explain what happened and what the person can do next.

A rewrite must preserve the requirement

ORIGINAL FIXTURE PROMPT

Return valid JSON only with fields category, article_id, confidence, and suggested_response. If confidence is below 0.7, set suggested_response to needs_review. Success: parser accepts the response.

SHORTER REWRITE

Return a clean structured answer with the best response for the user.

Expected winner: the original

The rewrite loses named fields, JSON-only output and the review condition.

Mentor review shaped the learner workflow

I proposed staged generation of personalized learner tasks, with a mentor checking the context and the output.

Simplified reconstruction of my 2024 proposal. Deployment and time savings were not established.

REVIEW GATE 01

REVIEW GATE 02

Start with one user task

For an implementation module, I would work with the business analyst and project team to build a guide around the actual task.

Establish the starting state and the result the user needs.

Document the steps, expected feedback, and recovery actions.

Pair the guide with a worked example and a practice task.

Review accessibility and product accuracy before delivery.

Proposed approach for discussion; no Mi-Case product or client access is implied.
