

Technical learning for TransPerfect

Selected work in guided practice,
technical clarity and careful AI use

Learning Experience Designer · U.S. remote contract

Learning design grounded in the task

At ASU Knowledge Enterprise, I developed digital learning materials and workshops with accessibility improvements and AI-supported content workflows.

April 2022–October 2024

MS in User Experience · BS in Technical Communication

A practical sequence for beginners

ChatGPT 4o for Beginners: Create Social Media Content

TASK OBJECTIVE

coursera

Task 3

Goals

Iteratively Transform Content Using AI

- Use ChatGPT to create an initial draft and make iterative refinements.
- Practice refining drafts using different prompt techniques and feedback loops.
- Analyze how each iteration impacts content quality and alignment with goals.

A first attempt gives learners something to revise

 Craft a post about Visit Brew Bliss for a great coffee experience

 Visit Brew Bliss for an Unforgettable Coffee Experience! 

Whether you're a seasoned coffee connoisseur or just in need of your daily caffeine fix, Brew Bliss has something special for you. Our cozy, family-owned café offers a warm and welcoming atmosphere paired with expertly crafted coffee that will elevate your day. From rich, aromatic espressos to indulgent lattes, every sip at Brew Bliss is a step towards coffee nirvana. Come for the coffee, stay for the experience. We can't wait to brew up some bliss for you!

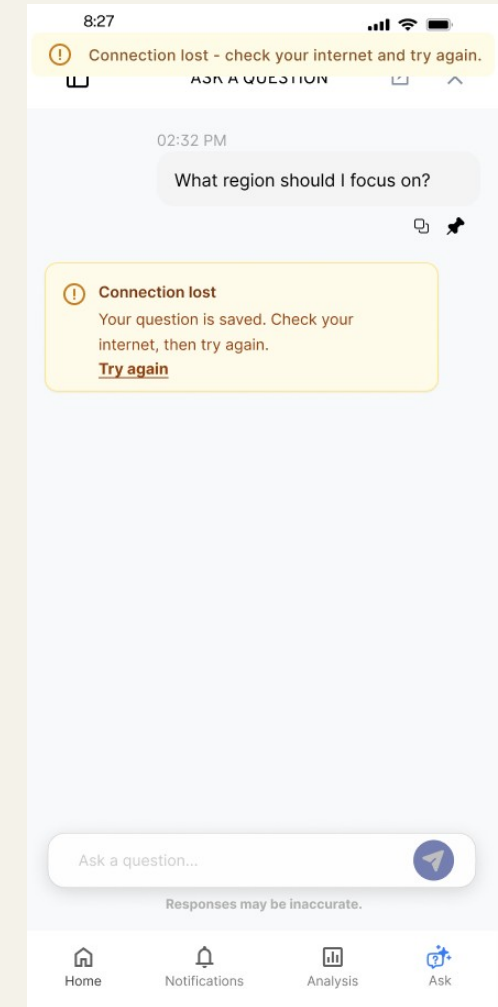

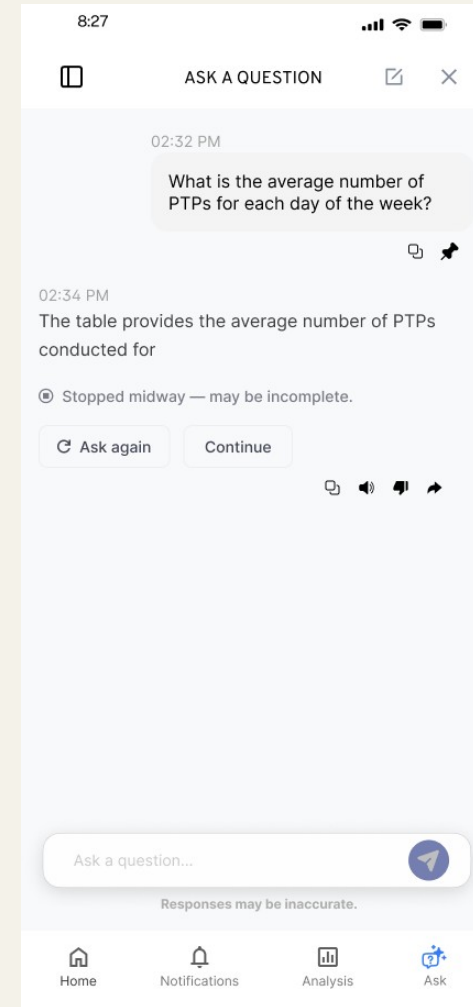

#BrewBliss #CoffeeLovers #CaféExperience #DrinkLocal

The next step is to make the request more specific and compare the result.

Recovery guidance has to describe the real state

An interrupted answer and a lost connection needed different messages and actions. I organized those states in Figma and annotated the behavior for engineering.

For technical learning: distinguish the condition before explaining the recovery action.

A rewrite must preserve the requirement

ORIGINAL FIXTURE PROMPT

Return valid JSON only with fields category, article_id, confidence, and suggested_response. If confidence is below 0.7, set suggested_response to needs_review. Success: parser accepts the response.

SHORTER REWRITE

Return a clean structured answer with the best response for the user.

Expected winner: the original

The rewrite loses named fields, JSON-only output and the review condition.

Mentor review shaped the learner workflow

I proposed staged generation of personalized learner tasks, with a mentor checking the context and the output.

Simplified reconstruction of my 2024 proposal. Deployment and time savings were not established.

One procedure.

A consistent learning set.

For a technical procedure, I would work from approved source material with your subject matter expert to define the task and its success conditions.

Storyboard the steps and the decisions learners must make.

Connect the example to a job aid and a facilitator activity.

Check a different scenario and explain the recovery choice.

Record the source owner and the materials affected by each update.

Proposed approach for discussion; no satellite production experience or client access is implied.

Learning Experience Designer

Based in Mesa, Arizona. Available for U.S. remote contracts.
Authorized to work without sponsorship. Available ASAP.
