

Design tools people can reason with.

Interaction states, reusable patterns,
and decisions a team can examine.

Selected work for Figma · September 2026

A useful first question

UX Designer & Researcher (Contract)
2025–2026

I explored suggested questions and a question library while keeping a person's own question close at hand.

Design deliverables and engineering handoff

Mobile and desktop conversation flows

Waiting is part of the conversation

I kept the question visible and gave the response a distinct waiting state.

Animation was an implementation question to resolve with engineering.

Original state detail

Recovery follows the failure

An incomplete answer and a lost connection need different next actions.

I assembled the flows and their next actions into an annotated handoff for engineering.

Incomplete answer

Connection lost

Feedback with context

UX Designer & Researcher (Contract), 2026

I connected a personal summary to its supporting observations and a useful next action.

Design iterations shown with sample content.
Web/server release confirmed September 2, 2026.

Your safety focus this week

Repeated lift-plan checks showed up across your recent observations.

Your recent work suggests the crew is paying closer attention to lift planning, but **pinch-point hazards** still need a quick reminder.

✓ Based on 5 observations and 2 conversations

[Use this in today's pre-task](#)

A comparison needs an interpretation

Mentioning fatigue less often is a comparison. Whether that is good depends on the context.

I raised the cohort, percentile and wording questions before they became interface rules.

Original widget, illustrative values

Competing entry points

Training an assistant, starting a Vibecheck and requesting support competed at the same entry point.

I used the audit to make these choices explicit for the team's review.

Usability evaluation and design recommendations

Error feedback beside the field

I made the problem field visible where a person could act on it.

The recommendation gave the team a specific behavior to discuss and prioritize.

Original

The original login form is titled "Ready, Set..." with the subtitle "Log in to access your account". It features two input fields: "Email Address" and "Password". The "Password" field has a toggle icon on the right. Below the fields are two buttons: "Log In" and "Send Me A One-Time Login Link".

Original error at the page footer

Error: Invalid login credentials

Proposed

The proposed login form is identical to the original, but with a red border around the "Password" field. A green feedback message "Incorrect Password" is displayed to the right of the field. The buttons "Log In" and "Send Me A One-Time Login Link" remain below the fields.

Proposed feedback beside the field

Prototype the uncertain behavior.

Start with the decision a creator needs to make. Prototype the ambiguous state and the next action.

Proposed approach: review the behavior with engineers and researchers, compare alternatives, and test what people understand.

Let's make complex tools easier to use

Available for Figma's Product Designer role, Design, Dev & AI Tools. Based in Mesa, Arizona; ready to start as soon as possible.
